Subject: drawings for BCS lawsuit (urgent)

I just noticed (after a more thorough review) that the drawing you made of Egan Camp (Bullis Charter School) campus is inaccurate, in a couple of different ways. The # of buildings is wrong (it's what there was on site when it was a full-fledged camp school) and the shared turf area is wrong.

I'll try to get you a more updated map of the campus. Aedis Architects may have something you can use, if you want to contact them. Henrik Malinowski and Todd Walter have been working on the campus for us, so you could try them at Aedis.
