Subject: calculating areas for me

Larry - I have plot plans of 4 sites on which I have circled the areas I need someone to calculate the square footage. Can I FAX these to you today so you will know what to do with them? I have a time crunch on this, so turnaround by end of week is needed.

Basically, I need to identify the square footage of K playground, other blacktop, and turf area (sports fields only) for each site. I use this data in developing a comparison matrix for determining where to locate the charter school we have.

Pls advise; thanks.

Randy Kenyon
