Tim Justus, Superintendent  
and Los Altos School District Board Members  
201 Covington Road  
Los Altos, CA 94024

Dear Superintendent Justus and LASD Board Members:

For several months, the Los Altos School District has been exploring the feasibility of asking voters to support an increase in the current District parcel tax. Passing the parcel tax would represent a significant victory for the school district and should also be of great benefit for everyone in the community.

Bullis Charter School would like to work with the District to help pass a new, increased parcel tax to benefit all public school students in our community.

Our Board and our parent community seek cooperation with the District on this important effort. We're convinced that Bullis Charter School can be a valuable asset to the District as the public effort gets underway. Understandably, the Bullis parent community has sought answers from our school's leadership regarding how their public school students might also benefit from the proposed parcel tax. We think this topic merits a thorough discussion with District leaders.

We are available to meet with you and your Board leadership at your earliest convenience.

On Behalf of the BCS Board,

Ken Moore  
BCS Board Chair
